

Esteemed COMPANY

Subject: Company Presentation

Established in February 2006, the Pienne Impianti Srl starts its activities based on the technical background of its members, Mr. Giuseppe Loparco e Mr. Nicola Mola, who has many years of experience gained in Italy and abroad, in the field of pipe and instrumental wirings.

In no time the society, under the Law of 5 March 1990 n. 46 laying down rules for the security of facilities, is authorized to install, modify, extend and maintain electrical systems of Art. 1 of Law no. 46/1990 using the professional requirements of the technical manager, and partner, Mr. Nicola Mola.

As part of their development strategies found that quality assurance should be an integral and fundamental part of the mission, for both internal growth of a strategic development in line with the times. In this perspective has therefore decided to implement an internal quality management system focused on continuous improvement and compliance with the law **UNI EN ISO 9001:2008** by RINA with certificate No. 17233/07/S. This policy is reviewed annually based on the results of the quality management system for the validation/ review of objectives and targets for improvement planned. Moreover, our Environmental, and Health and Safety Management System were certified in accordance with **ISO 14001: 2004** (Certificate No. EMS-6616 / S) and **OHSAS 18001:2007** (Certificato n° OHS-3144).

Among the primary objectives and investment of our company, there is safety in the workplace, where we train very strictly periodically all our staff; in this regard in 2008, we achieved a recognition by the company ARCELORMITTAL SpA, after a accurate Audit carried out by engineers of the matter, as a company with reliable medium - high, that still we are committed to maintain but also to improve.

Constituted an organic functional basic business, the company is recognized and accredited to perform work in the complex electro ARCELORMITTAL SpA Taranto, gaining direct contracts and on behalf of contractors such as: O.M.E.V. SRL, PRISMA IMPIANTI Srl, BM GROUP Spa, SMS CONCAST Spa and other companies involved in automation engineering for ARCELORMITTAL SpA.

To expand the operations, works were performed at the TENARIS plant in Dalmine (BG) and the SIDERURGICA SEVILLANA plant (Spain) gaining credit with the registration REA n.01990000177 and the certification of "Baja Tension"; the Establishment ALPA in France; and the Establishment OVAKO in Sweden.

Some activities performed in the ARCELORMITTAL Taranto, are listed below in detail:

Year 2008

Great stop TUL2 Department - Installation and automation Walkin Beam US TESTATE - Installation and automation cut-off 4	Blastfurnace 4 Department - Installation and instrumentation AFO
Wasteproducts Department (Biological) - Installation and instrumentation new wastewater treatment plant	

Year 2009

TUL 2 Department - Electrical installation on New Firescan Plant in tunnels - Installation and automation Pump Room	PLA2 Department - Installation and instrumentation on inspection plans 1&2 - Installation and automation Gantry Crane n° 5
---	--

Year 2010

Blast furnace 2 Department - New analysis points CO AFO2	Blast furnace 5 Department - Furnace breast-place temperature
TENARIS DEPARTMENT: - Plant expansion pipe line	Battery ovens Department: - Electrical installation e instrumentation on new loaders COKE 5&6 - Electrical installation e instrumentation on Guide COKE 3&4
TNA 2 Department - Electrical installation e instrumentation of stringers furnace n°3 - Electrical installation new TVCC system deposit cravings	

Year 2011

Steelworks 2 Department - New TVCC system full department, with conversion of all video signals to F.O.	TNA2 Department - Electrical installation and instrumentation of stringers furnace n°1
PLA2 Department - Electrical revamping on cages of roughing and finishing - Electrical revamping roller ways between roughing and finishing	OFE/LEM Department - New control system pumping stations V.V.F.
DALMINE spa Steelworks - Electrical installation and automation new Hydraulic Press Test	SIDERURGICA SEVILLANA (ES) Steelworks Department - Revamping automation on the Oven with implementation of new signals

Year 2012

SIDERURGICA SEVILLANA (ES) - Production plant power pack unified handling mill train	ALPA Establishment (FRA): - Revamping packaging area mill complete
ARCELORMITTAL TARANTO - Department TUL / 2: - Plant paintings operated welding head imbastitrici 1 & 2	Department FNA / 2: - Rebuilding electrical plant equipment line HSL2
Department PLA2: - Plant Drive chains	Department BATT 7/10: - Plant new guide coke 6bis
Department TUB / ERW: - Production Vai plant	PORT OF GENOA: - Revamping electrical and instrumental on board ships

Year 2013

V&M VALLOUREC DEPARTMENT – FRANCE - Rebuilding electrical systems automation oven LF	ARCELORMITTAL-TARANTO Department – TNA2 - Modernization automation finisher TNA 2
OVAKO DEPARTMENT – SWEDEN - New electrical system automation flue gas treatment	ARCELORMITTAL-TARANTO Department - New fiber-optic network area parks minerals
ARCELORMITTAL-TARANTO Department: Revamping electroinstrumental COKE charging-churning equipments	PORT OF RIJEKA (Croatia): - Revamping electrical and instrumental on board ships

Year 2014

- V&M VALLOUREC DEPARTMENT – FRANCE Electric melting furnace plant integration	ARCELORMITTAL-TARANTO Department: - Design, supply emergency lighting systems for fire prevention n° 3 Gasometers
OVAKO DEPARTMENT – SWEDEN - "I&C Revamping CCM"	ARCELORMITTAL-TARANTO Department: - Electrical installation Candle Vent Gas battery COKE
ARCELORMITTAL-TARANTO Department: - Electrical activities IV Sporgente c/ Taranto Sea port	MARITIME SERVICES SPA: - Electrical General servicing Fleet Ships RIVA

Year 2015

WILTON UTILITIES – UNITED KINGDOM - Revamping electroinstrumental	ARCELORMITTAL-TARANTO Department: Design and Implementation Faraday Cages
OVAKO DEPARTMENT – SWEDEN - "I&C Revamping Colata Continua"	ARCELORMITTAL-TARANTO Department: - Emergency Lighting System TUL/1
ARCELORMITTAL-TARANTO Department: - MODERNIZATION BATCHERS AGL/2	MARITIME SERVICES SPA: - Electrical General servicing Fleet Ships RIVA

Year 2016

ARCELORMITTAL-TARANTO Department: - Fire Detection System Modernization in Electrical Substations	ARCELORMITTAL-TARANTO Department: - Special Maintenance And Verification Of Structural n.4 Lighthouse Towers in "Cet/3" – TARANTO ENERGIA
ARCELORMITTAL-TARANTO Department: - Certification Statement Recoiler Machines Tna/1	ARCELORMITTAL-TARANTO Department: - Revamping electroinstrumental area CLS del FNA2
MARITIME SERVICES SPA: - Electrical General servicing Fleet Ships RIVA	ARCELORMITTAL-TARANTO Department: - Electrical montages Profilometer TNA2

Year 2017

ARCELORMITTAL-TARANTO Department: - New Electrical switchboards to PLA2	TEMPAROSSA Department – Corleto Peticara: - Instrumental Electrical Activities On Wells
ARCELORMITTAL-TARANTO Department: - Service Profilometer Installation to TNA2	ARCELORMITTAL-TARANTO Department: - Lighting Plant on the Production Area "Pla / 2 Sidercomit"
ARCELORMITTAL-TARANTO Department: - Well installation A5-12 /A5-23 OMO2	ARCELORMITTAL-TARANTO Department: - Weighing systems Silos AGL

The electro-installation systems activities carried out, both within complex projects "turnkey" that specific customer requirements, are normally handled by teams of technicians, supervised by site managers.

Immediately it's clear that the strength of the company is the company's staff and, specifically, the technical staff over the years has been the subject of a continuous improvement of professionalism until getting to count in the current period of 50 workers, including 5 administratives and 45 operatives among technical and employed workers. Clearly the number of staff changes in compliance with operational needs and, especially, for work in Italy and abroad, we cooperates with a company based in Slovenia and in Romania.

The company currently has equipment and resources needed for each type of maintenance, and a prefabricated structure at the area building sites ARCELORMITTAL.

In order to accredit the knowledge of our company and, remaining at your disposition, with the hope to begin a process of collaboration, Yours Sincerely

PIENNE IMPIANTI S.R.L.
