

Estemeed COMPANY

Subject: Company Presentation

Established in February 2006, the Pienne Impianti Srl starts its activities based on the technical background of its members, Mr. Giuseppe Loparco e Mr. Nicola Mola, who has many years of experience gained in Italy and abroad, in the field of pipe and instrumental wirings.

In no time the society, under the Law of 5 March 1990 n. 46 laying down rules for the security of facilities, is authorized to install, modify, extend and maintain electrical systems of Art. 1 of Law no. 46/1990 using the professional requirements of the technical manager, and partner, Mr. Nicola Mola.

As part of its development strategies, it considered that quality assurance must be an integral and fundamental part of the company's mission, both for internal growth and strategic development in line with the times. With this in mind, it has therefore decided to implement a quality management system based on continuous improvement and in compliance with **UNI EN ISO 9001:2015** by RINA with Certificate No. 17233/07/S. This policy shall be reviewed annually on the basis of the results of the quality management system for the validation/review of the planned objectives and improvement targets; In addition, our Environmental Management System and Health and Safety, are certified, in accordance with **ISO 14001:2015** (Certificate No. EMS-6616/S). and **ISO 45001:2018** (Certificate No. OHS-3144).

Among the primary objectives and investments of our company, there is safety in the workplace, where with great rigor we periodically train all our staff; in this regard in 2008 we achieved an award, by the company **ACCIAIERIE D'ITALIA** (ex ILVA) s.p.A, where a supplier code has been acquired since 2007 as a preferred company.

Furthermore, direct orders are acquired and on behalf of contractors both in Italy and abroad, such as:

A2A Ambiente, BM GROUP POLYTEC Spa, SMS GROUP Spa, SIEMENS Spa, SARRALLE S.L., Gruppo RIVA Spa.

In order to expand the operation, work was carried out at the **SIDERURGICA SEVILLANA** plant in Seville (Spain) accrediting us with the registration REA; **OVAKO** plant in Sweden, **ALPA** steelworks Gargenville and **V&M Saint Saulvé** in France, and **NLMK Clabecq** in Belgium.

The company's objectives aim to expand the range of direct customers in a constant growth that can allow despite the instability of the market to face all the challenges of the moment.

Here are some of the activities carried out from 2008 to today:

Year 2008

Great stop TUL2 Department - Installation and automation Walkin Beam US TESTATE - Installation and automation cut-off 4	Blastfurnace 4 Department - Installation and instrumentation AFO
Wasteproducts Department (Biological) - Installation and instrumentation new wastewater treatment plant	

Year 2009

TUL 2 Department - Electrical installation on New Firescan Plant in tunnels - Installation and automation Pump Room	PLA2 Department - Installation and instrumentation on inspection plans 1&2 - Installation and automation Gantry Crane n° 5
---	--

Year 2010

Blast furnace 2 Department - New analysis points CO AFO2	Blast furnace 5 Department - Furnace breast-place temperature
TENARIS DEPARTMENT: - Plant expansion pipe line	Battery ovens Department: - Electrical installation e instrumentation on new loaders COKE 5&6 - Electrical installation e instrumentation on Guide COKE 3&4
TNA 2 Department - Electrical installation e instrumentation of stringers furnace n°3	- Electrical installation new TVCC system deposit cravings

Year 2011

Steelworks 2 Department - New TVCC system full department, with conversion of all video signals to F.O.	TNA2 Department - Electrical installation and instrumentation of stringers furnace n°1
PLA2 Department - Electrical revamping on cages of roughing and finishing - Electrical revamping roller ways between roughing and finishing	OFE/LEM Department - New control system pumping stations V.V.F.

DALMINE spa Steelworks - Electrical installation and automation new Hydraulic Press Test	SIDERURGICA SEVILLANA (ES) Steelworks Department - Revamping automation on the Oven with implementation of new signals
---	--

Year 2012

SIDERURGICA SEVILLANA (ES) - Production plant power pack unified handling mill train	ALPA Establishment (FRA): - Revamping packaging area mill complete
ILVA TARANTO - Department TUL / 2: - Plant paintings operated welding head imbastitrici 1 & 2	Department FNA / 2: - Rebuilding electrical plant equipment line HSL2
Department PLA2: - Plant Drive chains	Department BATT 7/10: - Plant new guide coke 6bis
Department TUB / ERW: - Production Vai plant	PORT OF GENOA: - Revamping electrical and instrumental on board ships

Year 2013

V&M VALLOUREC DEPARTMENT – FRANCE - Rebuilding electrical systems automation oven LF	ILVA-TARANTO Department – TNA2 - Modernization automation finisher TNA 2
OVAKO DEPARTMENT – SWEDEN - New electrical system automation flue gas treatment	ILVA-TARANTO Department - New fiber-optic network area parks minerals
ILVA-TARANTO Department: Revamping electroinstrumental COKE charging-churning equipments	PORT OF RIJEKA (Croazia): - Revamping electrical and instrumental on board ships

Year 2014

- V&M VALLOUREC DEPARTMENT – FRANCE Electric melting furnace plant integration	ILVA-TARANTO Department: - Design, supply emergency lighting systems for fire prevention n° 3 Gasometers
OVAKO DEPARTMENT – SWEDEN - “I&C Revamping CCM”	ILVA-TARANTO Department: - Electrical installation Candle Vent Gas battery COKE
ILVA-TARANTO Department: - Electrical activities IV Sporgente c/ Taranto Sea port	MARITIME SERVICES SPA: - Electrical General servicing Fleet Ships RIVA

Year 2015

WILTON UTILITIES – UNITED KINGDOM - Revamping electroinstrumental	ILVA-TARANTO Department: Design and Implementation Faraday Cages
OVAKO DEPARTMENT – SWEDEN - “I&C Revamping Colata Continua”	ILVA-TARANTO Department: - Emergency Lighting System TUL/1
ILVA-TARANTO Department: - MODERNIZATION BATCHERS AGL/2	MARITIME SERVICES SPA: - Electrical General servicing Fleet Ships RIVA

Year 2016

ILVA-TARANTO Department: - Fire Detection System Modernization in Electrical Substations	ILVA-TARANTO Department: - Special Maintenance And Verification Of Structural n.4 Lighthouse Towers in "Cet/3" – TARANTO ENERGIA
ILVA-TARANTO Department: - Certification Statement Recoiler Machines Tna/1	ILVA-TARANTO Department: - Revamping electroinstrumental area CLS del FNA2
MARITIME SERVICES SPA: - Electrical General servicing Fleet Ships RIVA	ILVA-TARANTO Department: - Electrical montages Profilometer TNA2

Year 2017

ILVA-TARANTO Department: - New Electrical switchboards to PLA2	TEMPAROSSA Department – Corleto Peticara: - Instrumental Electrical Activities On Wells
ILVA-TARANTO Department: - Service Profilometer Installation to TNA2	ILVA-TARANTO Department: - Lighting Plant on the Production Area "Pla / 2 Sidercomit"
ILVA-TARANTO Department: - Well installation A5-12 /A5-23 OMO2	ILVA-TARANTO Department: - Weighing systems Silos AGL

Year 2018

ILVA-TARANTO Department: - WATER TREATMENT/COOLING SYSTEM dta/lam	Stabilimento TEMPAROSSA – Corleto Peticara: - Electrical instrumental activities on the wells
Stabilimento ILVA SPA-TARANTO: - Installation on Profile meter TNA2	ILVA-TARANTO Department: - SAFETY IMPROVEMENT RECLAIMER
ILVA-TARANTO Department: - MAINTENANCE OF FILTER INSULATORS	ILVA-TARANTO Department: - Replacement/Maintenance UPS / AGL

Year 2019

ARCELOR MITTAL ITALIA SPA-TARANTO Department: - Electrical activities on the NEW LAY OUT FINI. PARCHI / AIA	Department Riva Acciaio "Hes-plant" GERMANIA - Realization of electrical systems
Department ARCELOR MITTAL ITALIA SPA-TARANTO - Installation of service profile TNA2 REFACE INSTRUMENTATION FAL3	Department: ARCELOR MITTAL ITALIA SPA-TARANTO - LAF MAN/ELE ANNUAL MAINTENANCE CP

Year 2020

Plant ARCELOR MITTAL ITALIA SPA-TARANTO SIL1-FINI LINE	Plant ARCELOR MITTAL ITALIA SPA-TARANTO - Fire detection FAP tapes
Plant ARCELOR MITTAL ITALIA SPA-TARANTO - NCH4 control unit	

Year 2021

ARSENAL OF TARANTO: - IMP. SUPPLY OF EME DIESEL	Plant ACCIAIERIE D'ITALIA SPA -TARANTO - Note. Fires Fin. Torn. Galler TNA2
Waste Treatment Plant Stored in Bales (RSB) Caivano (NA): - WASTE TREATMENT - contractor A2A/BM GROUP	PLANT NLMK CLABECQ SA ITTRE, BELGIO: Realization of electrical systems for new sheet metal tracking
Plant ACCIAIERIE D'ITALIA SPA -TARANTO - Dampening Tapes II-IV Sporg.	Plant ACCIAIERIE D'ITALIA SPA -TARANTO - FIBRE OPTIC DIE

Anno 2022

PLANT ACCIAIERIE D'ITALIA SPA-TARANTO - Various orders	Plant SIDERURGICA SEVILLANA – SPAGNA: - - New SPOOLER electrical system
---	--

The electro-installation systems activities carried out, both within complex projects "turnkey" that specific customer requirements, are normally handled by teams of technicians, supervised by site managers.

Immediately it's clear that the strength of the company is the company's staff and, specifically, the technical staff over the years has been the subject of a continuous improvement of professionalism until getting to count in the current period of 45 workers, including 3 administratives and 42 operatives among technical and employed workers.

Clearly the number of personnel varies according to operational needs and above all for jobs in Italy and abroad.

The company currently has the necessary equipment and means for any type of maintenance.

In order to validate the knowledge of our company and, remaining at your disposal, with the wish to start a collaboration process.

Yours Sincerely

PIENNE IMPIANTI S.R.L.
